

Pakistan does not lack good people.

Pakistan lacks informed leadership.

People love Pakistan. What is missing is not commitment — it is a working picture of how the state operates. Forty-nine articles, twenty-one national systems, and an interactive map, in English and Urdu, free to teach from without permission or cost.

Who it is for

- **University courses** — political science, public policy, law, journalism, development studies. Levels 2–4 fit one semester.
- **School teachers** — Pakistan Studies at matric, O and A level. Level 1 assumes no background.
- **Exam preparation** — Pakistan Affairs, Political Science, Governance.
- **Study circles and newsrooms.**

What makes it different

- Built around a **systems map**, not a reading list — students see how institutions connect.
- Every article carries an **evidence label**: sourced, contested, historical, illustrative or uncited.
- **Full Urdu parity** — every article exists in both languages.
- Nonpartisan by method: the same standard applied in every direction.

The sequence

LEVEL	ARTICLES	WHAT STUDENTS SHOULD BE ABLE TO DO BY THE END
1 Foundations	9	Say what an institution is, and why it outlasts the person running it.
2 Systems	15	Explain what a given system governs, what it depends on, and where it breaks.
3 Analysis	14	Follow a failure through the state, from its cause to a household.
4 Reform	5	Say what has to be true before a reform can work, who resists it, and what it costs.
5 Leadership	6	Turn an understanding into a decision somebody can actually take.

You may do all of this without asking

- Copy, print and photocopy any article, for any number of students.
- Translate it, adapt it, or lift sections into your own handouts.
- Republish it elsewhere, in whole or in part — with or without attribution.
- No fee, no licence, no registration, nothing to sign.

pakistanleadership.pages.dev/teachers

Scan it, or type it — the reading list, the classroom questions and the systems map.

Who publishes this. An independent civic-education project, published under the name Sawal. It is not a university and awards no degrees. There is no advertising and no paywall, and it takes no funding from any party, government, company or donor. Ten of its articles currently cite no sources and say so on the page — that transparency is deliberate, and judging it is a legitimate classroom exercise in itself.
